# TimeOut

Grammar™

Remember when spelling checkers were considered inconvenient? Well . . . they were inconvenient. But now all word processors have built-in spell checkers, and everyone uses them. It's been the same with grammar checkers. Until now. New TimeOut Grammar adds built-in grammar checking to your AppleWorks word processing. With TimeOut Grammar, you got the power to guard your writing against embarrassing errors. No matter what you write, from a high-school paper to an annual report, TimeOut Grammar will make it stronger, clearer and more concise.

TimeOut
Grammar™

TimeOut Grammar is easy to use. When it detects a writing error, such as a noun-verb disagreement, it highlights the offending phrase, explains the error, and suggests a better way to say the same thing. You have the option to accept the suggestion, ignore it, orrewrite the phrase in a different way. It's your writing, and your style—only better and more readable.
